

aWhere

Provides:

This API provides information about various crops

Key Provisioning:

Pain factor

(0=ezipz...5=nightmare): 

- Click on “Get Started”, then “Create Account” to fill in the info needed for registering.
- You will receive an email verification.
- Make a new app in order to get API and secret keys.

Quotas:

- 20 requests per hour

The Good:

- Easy to make an account and generate keys.
- No limit on number of keys you can generate on one account

The Bad:

- 20 requests per hour is an amount that is easy to cap out.
- API and Secret keys require base64 encoding in order to authenticate API usage.

The Ugly:

- No matter how many keys you make on one account, they will all share the same 20 hourly requests limit.
