Collected Knowledge & Wisdom on

World Weather Online

Provides:

This API provides access to a bevy of historical weather data.

Key Provisioning: **Pain factor** (*0=ezpz...5=nightmare*): <mark>2</mark>

- Navigate to WWO's API website, and create an account. Follow the prompts to create your account (you can also login using Github, Google+, or Facebook).
- Once logged in, the API key will be available in the dashboard.

Quotas:

- 1,000 requests/day

The Good:

- EXTREMELY comprehensive in terms of data returned
- Lots of APIs to choose from

The Bad:

- A lot of JSON is sent with every request, especially if the API is given a large date range

The Ugly:

- If you log in using Github, the website has read AND write access to your Github account (can be bypassed by not using Github).
